Volume Contents

NUMBER 1

Airi Salminen and **Frank Wm. Tompa** — 1 — Grammars++ for modelling information in text

Nicolas Pasquier, Yves Bastide, Rafik Taouil and **Lotfi Lakhal** — 25 — Efficient mining of association rules using closed itemset lattices

X. Sean Wang and **Chang Li** — 47 — Deriving orthogonality to optimize the search for summary data

NUMBER 2

Meta-Modelling and Methodology Engineering

Guest Editorial
Kalle Lyytinen and **Richard Welke** — 67 — Special issue on meta-modelling and methodology engineering

Invited Project Review
Philip A. Bernstein, Thomas Bergstraesser, Jason Carlson, Shankar Pal, Paul Sanders and **David Shutt** — 71 — Microsoft Repository Version 2 and the open information model

Vincent Englebert and **Jean-Luc Hainaut** — 99 — DB-MAIN: a next generation meta-CASE

Jos Van Hillegersberg and **Kuldeep Kumar** — 113 — Using metamodelling to integrate object-oriented analysis, design and programming concepts

Hans W. Nissen and **Matthias Jarke** — 131 — Repository support for multi-perspective requirements engineering

Dickson K. W. Chiu, Qing Li and **Kamalakar Karlapalem** — 159 — A meta modeling approach to workflow management systems supporting exception handling

NUMBER 3

ADVANCED INFORMATION SYSTEMS ENGINEERING

Guest Editorial
Barbara Pernici and **Constantino Thanos** — 185 — Special issue on advanced information systems engineering

Vagelio Kavakli and **Pericles Loucopoulos** 187 Goal-driven business process analysis application in electricity deregulation

Sjaak Brinkkemper, Motoshi Saeki and **Frank Harmsen** 209 Meta-modelling based assembly techniques for situational method engineering

Matthias Jarke, Manfred A. Jeusfeld, Christoph Quix and **Panos Vassiliadis** 229 Architecture and quality in data warehouses: an extended repository approach

Fabio Casati, Mariagrazia Fugini and **Isabelle Mirbel** 255 An environment for designing exceptions in workflows

NUMBER 4

José Miguel Blanco, Alfredo Goñi and **Arantza Illarramendi** 275 Mapping among knowledge bases and data repositories: precise definition of its syntax and semantics

Walid Aref and **Daniel Barbará** 303 Supporting electronic ink databases

Andrew Dinn, Norman W. Paton and **M. Howard Williams** 327 Active rule analysis and optimisation in the rock & roll deductive object-oriented database

NUMBER 5

Irene Kwan and **Joseph Fong** 355 Schema integration methodology and its verification by use of information capacity

Nenad Jukic, Susan V. Vrbsky, Allen Parrish, Brandon Dixon and **Boris Jukic** 377 A belief-consistent multilevel secure relational data model

Luigi Palopoli, Domenico Saccà and **Domenico Ursino** 401 DL_P: a description logic for extracting and managing complex terminological and structural properties from database schemes

NUMBER 6

INFORMATION SYSTEMS SUPPORT FOR ELECTRONIC COMMERCE

Guest Editorial
Michael P. Papazoglou and **Aphrodite Tsalgatidou** 425 Special issue on information systems support for electronic commerce

D. Georgakopoulos, H. Schuster, A. Cichocki and **D. Baker** 429 Managing process and service fusion in virtual enterprises

G. Froehlich, H. J. Hoover, W. Liew and **P. G. Sorenson** 457 Application framework issues when evolving business applications for electronic commerce

D. Jutla, P. Bodorik and **Y. Wang** 475 Developing internet E-commerce benchmarks

B. Rachlevsky-Reich, I. Ben-Shaul, N. T. Chan, A. W. Lo and **T. Poggio** 495 GEM: a global electronic market system

A. Corradi, M. Cremonini, R. Montanari and **C. Stefanelli** 519 Mobile agents integrity for electronic commerce applications

I Call for papers

NUMBER 7

Wilfred Ng 535 Ordered functional dependencies in relational databases

A. T. Berztiss 555 Domain analysis for business software systems

Frank Neven, Jan Van den Bussche, Dirk Van Gucht and **Gottfried Vossen** 569 Typed query languages for databases containing queries

Jarek Gryz 597 Query rewriting using views in the presence of functional and inclusion dependencies

NUMBER 8

Naveen Prakash 613 On method statics and dynamics

Wil M. P. van der Aalst 639 Process-oriented architectures for electronic commerce and interorganizational workflow

Arthur J. Bernstein, David S. Gerstl and **Philip M. Lewis** 673 Concurrency control for step-decomposed transactions
